Hello Robert and Barb,

Here is a summary of our conversation this morning. I've included Andrew Patterson since he can provide clarity on a few issues that we discussed.

- 1) Would the MSC like to hear from the EPA regarding their proposed prospective water monitoring program as it relates to horizontal shale wells? The EPA is looking for industry participation and perhaps the MSC could invite them to speak at one of our meetings?
- 2) There is an MSC meeting in August in State College PA. The next meeting is in Philly in Sept at the Insight meeting.
- 3) There was a question raised concerning the MSC water analysis database. Is the database publically available for review and if not, will it ever be?
